

BOUNDARY POWER

Nano SAPS

Small load, plug and play
Stand-alone power system (SAPS)

Nano SAPS

A stand-alone power solution for smaller, remote loads

The Nano SAPS was developed by Boundary Power to supply 240VAC in a stand-alone capacity, without the need for mains power or a back-up generator.

Features

- ▶ Ease of transport for rapid deployment/ redeployment
- ▶ Plug and play commissioning
- ▶ Small footprint – suitable for difficult terrain
- ▶ Integration into customer metering and reporting systems for remote monitoring and control
- ▶ AC and DC applications
- ▶ Low maintenance design
- ▶ Robust and weatherproof

Typical applications

The Nano SAPS is suited to smaller loads such as domestic and single load rural and industrial application.

Such applications may include:

- ▶ Remote communications
- ▶ Telecommunications
- ▶ Small farming loads
- ▶ Powering small pumps
- ▶ Electric fences
- ▶ Dwellings
